

ENVIRONMENTAL POLICY

TEP Ex d.o.o. is paying special attention and taking good care to protecting the environment on locations they perform their activities of production, packaging and storage, or provides services, appropriate to the nature, scope and impact on the environment and preserving of natural resources. As an organization, aware of the importance of the environment, we are committed to:

- use working processes and technology to reduce environmental pollution,
- meet applicable low requirements, as well as the requirements of the contracts and assumed obligations, and, when necessary, set internal standards and requirements
- prevent the pollution,
- when it is appropriate, to implement effective corrective actions,
- continuous improvement of the environmental management system.

The above activities are accomplished through implementation of environmental management policy, which is established and maintained in conformity with ISO 14001 requirements.

Duties and obligations of all employees in TEP Ex are to familiarize themselves with the determined environmental management policy, its continuous implementation and constant care for environmental issues, understanding the importance of reaching the set goals.

The Company management fully supports the environmental objectives and policy and is committed to fulfilling its own promises and commitments.

In Zabok, 19.03.2016.
