2. GENERAL SAFETY INFORMATIONS

WARNING!

The user manual contains basic information about the product. Mounting, installation, usage and maintenance should be carried out under this user manual to provide and ensure safe operation within the nominal characteristics. This user manual complement national Regulation and Standards. The responsible person shall ensure their implementation. Failure off implement this user manual can reduce explosion protection and endanger people, property and the environment. Any improper and illegal actions as well as non-compliance with the provisions of this user manual excludes all responsibility by manufacturer side.

Before installation/commissioning:

- Carefully read all instructions,
- Execute proper training of responsible personnel,
- Check that the contents of these instructions is fully understandable by the responsible personnel,
- Make sure that all the requirements and national Regulations as well as all special security measures are applied.

In lack of understanding:

- Contact the manufacturer.

During operation:

- Ensure that this user manual and other work instructions are available to the responsible staff at all times,
- Check the implementation of these instructions and all other safety user's instructions.

TEPEX d.o.o. tel. 049 222 900 fax. 049 426 450 e-mail: tepex@tepex.hr www.tepex.hr	USER MANUAL FOR EXPLOSION PROTECTED CONTROL UNITS TYPE SKX 12 - SKX 15		
	Broj: TEPEX.RS.025	Rev : 6	Datum: 10.2025.

3. PURPOSE

Explosion protected control units type SKX 12 - SKX 15 are intended for use in control, distribution and signaling circuits in areas where an explosive gas and/or dust atmosphere may be present, respectively in hazardous areas 1, 2, 21, 22 in accordance with the standards EN 60079-10-1 and EN 60079-10-2

4. DEGREE OF PROTECTION

Explosion protection is in accordance with the "General requirements" in the types of protection "Flameproof enclosure", "Increased safety", "Intrinsic safety", "Encapsulation" and "Protection by enclosure" in accordance with standards:

- EN IEC 60079-0:2018,
- EN 60079-1:2014,
- EN IEC 60079-7:2015/A1:2018,
- EN 60079-11:2012,
- EN 60079-18:2015/A1:2017,
- EN 60079-31:2014.

Design and construction of products are in accordance with apparatus standards EN 60947-1, EN 60947-5-1, EN 60947-5, EN 60204 and all other related standards.

Control units are in conformity with EU Directives: ATEX Directive 2014/34/EU, LV Directive 2014/35/ EU, EMC Directive 2014/30 EU, RoHS Directive 2011/65/EU.

Control units are designed, produced and tested in conformity with the Quality management systems in accordance with EN ISO 9001 and EN ISO/IEC 80079-34.

6. LIMITATION OF USAGE

Housings MMK 12-15 for M1 and M2 must be protected from impact as they are tested for lower impact energy according to EN 60079-0.

Requirements for clearance and creeping distance are according to EN 60079-7, sections 4.3 and 4.4 must be met.

Accessories used for cable glands and unused entries must have mechanical protection IP66 and be certificate according to EN 60079-0, EN 60079-7 and EN 60079-31.

When defining rated operational current for a given cable cross-section, the maximum permissible current of the clamp and the connecting cable or conductor should be considered.

Control unit according to customer's request is marked with standard model code - SKX 12, SKX13, SKX 14, SKX 15 and MSRU number. MSRU number represents the factory serial number.

For example SKX 15/MSRU 1234.12

Control unit, as a single unit formed of more enclosures, are marked with standard model code of each used enclosure - SKX 12, SKX13, SKX 14, SKX 15 and MSRU number. MSRU number represents the factory serial number.

For example SKX 14-15/MSRU 1235.13

- In case of repetition of the housing of the same type, e.g. five SKX 14 housings, the marking is as follows:

5 x SKX 14 / MSRU 1234.

- In case of repetition of the housing of the same type, e.g. one housing SKX 13 and two housings SKX 14, the marking is as follows:

SKX 13/2 x SKX 14 / MSRU 1234.

11. INSPECTION, MAINTENANCE, REPAIR, OVERHAUL

Inspection and maintenance have to be performed in accordance with standard EN 60079-17, manufacturer's user manual, national regulations, and user policy.

Repair should be done by the manufacturer or a person legally authorized by the manufacturer, with original parts according to products documentation, in accordance with standard EN 60079-19.

In case of improper installation, failure of inspection and maintenance, unauthorized repair or any overhaul on the product, the manufacturer is free of all responsibility, and the Declaration of Conformity becomes invalid.

Explosion protected control units type SKX 12 - SKX 15 are labelled with:

- External marking plate:

- Internal label:

- 1) Model code
- 2) Rated voltage U_e - depends on the built-in components
- 5) Factory number
- 6) Date, month/year

- Warning label:
